SHAKTHIVEL CHANDRASEKHAR

Full-Stack Node.js Developer | AI & Data Science Engineer

📍 Chennai, Tamil Nadu, India | 📞 7200703368 | ✉ shakthic007@gmail.com | 🔗 linkedin.com/in/shakthivelchandrasekhar

PROFESSIONAL SUMMARY

Results-driven Node.js Developer and AI enthusiast with 11+ months of hands-on experience building scalable RESTful APIs, real-time applications, and AI-powered web platforms. Proficient in PostgreSQL database design, role-based access control (RBAC), Kafka messaging, AWS deployment, and CI/CD pipelines using Jenkins. Passionate about applying machine learning and generative AI to solve real-world problems. Pursuing M.Tech in Artificial Intelligence with a strong foundation in data science, statistics, and backend engineering.

TECHNICAL SKILLS

Languages:	JavaScript (Node.js), Python, SQL
Backend:	Node.js, Express.js, RESTful API Design, CRUD Operations, RBAC
Databases:	PostgreSQL, Database Schema Design
DevOps & Cloud:	Jenkins (CI/CD), AWS (EC2/S3), Docker (basic)
AI / ML:	Deep Learning (TFA), Generative AI, Data Science, Blockchain
Tools:	Postman, Git, GitHub, Linux
Soft Skills:	Problem Solving, Technical Documentation, Team Collaboration

PROFESSIONAL EXPERIENCE

Swasth Mind *Feb 2024 – Dec 2024 (11 months)*

Node.js Developer Intern Chennai, India

- Designed and developed a real-time Chat Application using Node.js, integrating WebSocket for low-latency messaging.
- Implemented Infinite Scroll functionality to optimize data loading performance in a reels-style application.
- Architected and structured scalable PostgreSQL database schemas supporting complex relational data models.
- Built and maintained dynamic RESTful API endpoints following CRUD principles for a content management system (CMS).
- Documented 30+ API endpoints using Postman, improving onboarding speed and team productivity.
- Implemented Role-Based Access Control (RBAC) to enforce secure, permission-driven access across the platform.
- Gained practical experience with Apache Kafka for event-driven architecture and asynchronous messaging.
- Set up and managed Jenkins CI/CD pipelines to automate build, test, and deployment workflows.
- Contributed to SwasthMind CMS daily_post management module using generative AI integrations.
- Assisted in AWS server deployment, gaining hands-on experience with cloud infrastructure management.

Microsoft Learn Student Ambassadors *Sep 2023 – Oct 2024 (1 year 2 months)*

Student Ambassador – Beta Chennai, India

- Promoted Microsoft's learning ecosystem to 200+ students and educators across campus.
- Organized workshops and technical sessions on Azure, AI, and cloud computing fundamentals.
- Served as a bridge between Microsoft's global MLSA network and local student communities.

EDUCATION

Saveetha School of Engineering *Sep 2025 – Sep 2027 (Pursuing)*

M.Tech – Artificial Intelligence Chennai, India

Specialization in AI, deep learning, neural networks, and intelligent systems.

Dr MGR Educational and Research Institute *2021 – 2023*

B.Tech – Data Science with Artificial Intelligence Chennai, India

Core coursework: Statistics, Machine Learning, Data Analysis, Programming Fundamentals.

CERTIFICATIONS

- Data Science Foundations – Level 2 (V2) — IBM
- Artificial Intelligence Analyst — IBM
- Introduction to Model Context Protocol (MCP)
- Naukri Campus Young Turks
